David,

I'm working the whole week of December 17th and would like to participate in the meeting with the Corps. Monday and Tuesday are my busiest days that week, the rest of the week has more availability, if that worked for others as well.

This week, I'm working Monday and Friday and in California at the West Coast Regional Planning Body Meeting Tuesday-Thursday.

Thanks,

Jill

Hi David-

I am teleworking on Monday and have a nearly all-day webinar on one of the Canadian projects. However, the meeting does not start until 9 and there is also a lunch break. So I can talk between 8-9 or noon -1 on Monday and will try you during one of these times. I also have open times on Tuesday. Wednesday through Friday I am traveling to the American Exploration and Mining Association meeting/conference in Reno.

Patty

Would like to check in with each of you regarding attendance at this meeting described below. Couldn't find a good time to meet Monday (and believe Patty may be on the road). Please call or stop by when you are able.

R. David Allnutt, Director

Office of Environmental Review and Assessment

U.S. EPA, Region 10

1200 Sixth Avenue, Suite 900

Seattle, Washington 98101-3140

David,

Can you please plan to participate and rsvp accordingly?

Thank you,

Michelle

Subject: Participation in pre-application teleconference/webinar

Good morning Ms. Pirzadeh,

In follow up to my voicemail, I am the Regulatory Division Program Manager for the US Army Corps of Engineers Alaska District. We are anticipating the submittal of a Department of the Army Permit Application from the Pebble Limited Partnership (PLP) on 22 Dec 17. I would like to hold a pre-application meeting with action agencies and potential cooperators the week of December 17th via webinar and teleconference. Please let me know your availability that week or the appropriate staff member to contact for their availability. I anticipate the call will be one hour and very high level based on the information we have at this time. Our goal will be to share information so agencies can begin to think about aligning resources and potential timing considerations. I have attached a proposed project map provided by PLP for your information.

Thank you very much
Sheila
